Subject index

Acrylate ions
Covalent binding of viologen to electrode surfaces coated with poly(acrylic acid) formed by electropolymerization of acrylate ions. I. Electrode preparation and characterization (Katz et al.) 247
Acrylic acid
Covalent binding of viologen to electrode surfaces coated with poly(acrylic acid) prepared by electropolymerization of acrylate ions. II. Effect of the ionization state of the polymeric coating on the formal potential of viologen (Katz et al.) 261
Adsorption
Adsorption of bisulfate anion on a Pt(111) electrode: a comparison of in-situ and ex-situ IRAS (Ogasawara et al.) 337
Pyridine adsorption on reconstructed and unreconstructed Au(100) (Skoluda et al.) 343
Adsorptive stripping voltammetry
Adsorptive stripping square-wave voltammetry of Bi(III) in chloride media. Influence of triton X-100 (Komorsky-Lovrić, Branica) 273
Amperometric glucose sensor
A theoretical model for an amperometric glucose sensor using polypyrrole as the immobilization matrix (Marchesiello, Geniès) 35
Auger electron spectroscopy
Spectroscopic studies of lithium in an ultra-high vacuum system (Aurbach et al.) 63
Austenitic stainless steel
Semiconducting properties of passive films on AISI 304 and 316 stainless steels (Babić, Metikoš-Huković) 143

Bismuth-chlorocomplex voltammetry
Adsorptive stripping square-wave voltammetry of Bi(III) in chloride media. Influence of triton X-100 (Komorsky-Lovrić, Branica) 273
Bisulphate anoin
Adsorption of bisulfate anion on a Pt(111) electrode: a comparison of in-situ and ex-situ IRAS (Ogasawara et al.) 337
Bridge-group Electron transfer
Non-Condon effects in adiabatic bridge-group-assisted electron transfer reactions (Kuznetsov et al.) 21
Bromobenzene
Hammett reaction constants for the electroreduction of substituted chloro- and bromobenzenes: effect of solvent dynamics on the two-electron irreversible reductive cleavage (Jaworski et al.) 203

Cation effects
Effect of cations on the electrochemical behavior of *p*-toluenesulfonate-doped polypyrrole in various aqueous solutions (Iseki et al.) 221
Chlorobenzene
Hammett reaction constants for the electroreduction of substituted chloro- and bromobenzenes: effect of solvent dynamics on the two-electron irreversible reductive cleavage (Jaworski et al.) 203
Contaminants
Spectroscopic studies of lithium in an ultra-high vacuum system (Aurbach et al.) 63
Copper-heptacyanonitrosylferrate film
Electrochemical study of copper-heptacyanonitrosylferrate film modified electrodes: preparation, properties and applications (Gao et al.) 161
Corrosion
Semiconducting properties of passive films

on AISI 304 and 316 stainless steels (Babić, Metikoš-Huković) 143
Cyclic voltammetry
Cyclic voltammetric study of mixed monolayers of methylene blue and Triton X-100 formed spontaneously on mercury (Rodríguez-Amaro et al.) 127
Digital simulation of steady state and non-steady state voltammetric responses for electrochemical reactions occurring at an inlaid microdisk electrode. Application to EC_{irr}, EC′ and CE first-order reactions (Lavagnini et al.) 193

Diffusion limited reaction
Electrochemical measurements under microgravity conditions; diffusion limited reaction observed by potential step experiment (Nakabayashi et al.) 333
Digital simulation
Digital simulation of steady state and non-steady state voltammetric responses for electrochemical reactions occurring at an inlaid microdisk electrode. Application to EC_{irr}, EC′ and CE first-order reactions (Lavagnini et al.) 193
Double-layer impedance
The double-layer impedance at a rough surface: numerical results (Leibig, Halsey) 77

Electrically conducting films
Effect of cations on the electrochemical behavior of *p*-toluenesulfonate-doped polypyrrole in various aqueous solutions (Iseki et al.) 221
Electrocatalysis
Electrochemical study of copper-heptacyanonitrosylferrate film modified electrodes: preparation, properties and applications (Gao et al.) 161
Electrocatalysis of metalloporphyrins. Part 13. Electrocatalysis of several water-soluble porphyrins for the oxidation of some small molecules (Pang, Wang) 235
Electrochemical response
Closed-form approximate expressions for the electrochemical response of microelectrodes in the zero range limit (Brodsky et al.) 1
Electrodeposition
Electrochemical study of copper-heptacyanonitrosylferrate film modified electrodes: preparation, properties and applications (Gao et al.) 161
Electrodeposition processes of palladium and rhodium monolayers on Pt(111) and Pt(100) electrodes studied by IR reflection absorption spectroscopy (Inukai, Ito) 307
Electron slowing
Photoemission from metals and the slowing of low energy electrons in water (Benderskii, Grebenshchikov) 111
Electro-oxidation
Electrocatalysis of metalloporphyrins. Part 13. Electrocatalysis of several water-soluble porphyrins for the oxidation of some small molecules (Pang, Wang) 235
Electropolymerization
Covalent binding of viologen to electrode surfaces coated with poly(acrylic acid) formed by electropolymerization of acrylate ions. I. Electrode preparation and characterization (Katz et al.) 247
Covalent binding of viologen to electrode surfaces coated with poly(acrylic acid) prepared by electropolymerization of acrylate ions. II. Effect of the ionization state of the polymeric coating on the formal potential of viologen (Katz et al.) 261
Electroreduction
Hammett reaction constants for the electroreduction of substituted chloro- and bromobenzenes: effect of solvent dynamics on the two-electron irreversible reductive cleavage (Jaworski et al.) 203

Ge adsorption
Bulk alloy formation during Ge adsorption onto a Pd-powder catalyst (Bodnar et al.) 327
Glucose oxidase
A theoretical model for an amperometric glucose sensor using polypyrrole as the immobilization matrix (Marchesiello, Geniès) 35

Half-wave potential
Hammett reaction constants for the electroreduction of substituted chloro- and bromobenzenes: effect of solvent dynamics on the two-electron irreversible reductive cleavage (Jaworski et al.) 203
Hammett reaction constants
Hammett reaction constants for the elec-

troreduction of substituted chloro- and bromobenzenes: effect of solvent dynamics on the two-electron irreversible reductive cleavage (Jaworski et al.) 203

Immobilization
A theoretical model for an amperometric glucose sensor using polypyrrole as the immobilization matrix (Marchesiello, Geniès) 35
Impedance spectra
Electrochemical behaviour of the passive tin electrode in H_2SO_4 solutions at very positive potentials (Bojinov et al.) 177
Inlaid microdisk electrode
Digital simulation of steady state and non-steady state voltammetric responses for electrochemical reactions occurring at an inlaid microdisk electrode. Application to EC_{irr}, EC′ and CE first-order reactions (Lavagnini et al.) 193
Ion-free layer thickness
Generalization of the UDCA theory and its application to the analysis of the ion-free layer thickness (Andreu et al.) 49
IR reflection absorption spectroscopy
Electrodeposition processes of palladium and rhodium monolayers on Pt(111) and Pt(100) electrodes studied by IR reflection absorption spectroscopy (Inukai, Ito) 307

Lithium
Spectroscopic studies of lithium in an ultra-high vacuum system (Aurbach et al.) 63

Mathematical model
A theoretical model for an amperometric glucose sensor using polypyrrole as the immobilization matrix (Marchesiello, Geniès) 35
Mathematical models
The double-layer impedance at a rough surface: numerical results (Leibig, Halsey) 77
Electrochemical behaviour of the passive tin electrode in H_2SO_4 solutions at very positive potentials (Bojinov et al.) 177
Mercury
Cyclic voltammetric study of mixed monolayers of methylene blue and Triton X-100 formed spontaneously on mercury (Rodríguez-Amaro et al.) 127
Methylene blue
Cyclic voltammetric study of mixed monolayers of methylene blue and Triton X-100 formed spontaneously on mercury (Rodríguez-Amaro et al.) 127
Microelectrodes
Closed-form approximate expressions for the electrochemical response of microelectrodes in the zero range limit (Brodsky et al.) 1
Micro-gravity conditions
Electrochemical measurements under micro-gravity conditions; diffusion limited reaction observed by potential step experiment (Nakabayashi et al.) 333
Modified electrodes
Electrochemical study of copper-heptacyanonitrosylferrate film modified electrodes: preparation, properties and applications (Gao et al.) 161
Optical properties of Prussian-Blue-modified gold and platinum single-crystal electrodes (Upadhyay, Kolb) 317
Modified Gollny–Chapman theory
Generalization of the UDCA theory and its application to the analysis of the ion-free layer thickness (Andreu et al.) 49
Monolayers
Cyclic voltammetric study of mixed monolayers of methylene blue and Triton X-100 formed spontaneously on mercury (Rodríguez-Amaro et al.) 127
Electrodeposition processes of palladium and rhodium monolayers on Pt(111) and Pt(100) electrodes studied by IR reflection absorption spectroscopy (Inukai, Ito) 307
Mott–Schottky
Semiconducting properties of passive films on AISI 304 and 316 stainless steels (Babić, Metikoš-Huković) 143

Non-Condon effects
Non-Condon effects in adiabatic bridge-group-assisted electron transfer reactions (Kuznetsov et al.) 21
Numerical methods
The double-layer impedance at a rough surface: numerical results (Leibig, Halsey) 77

Optical properties
Optical properties of Prussian-Blue-modified gold and platinum single-crystal electrodes (Upadhyay, Kolb) 317

Palladium
Electrodeposition processes of palladium and rhodium monolayers on Pt(111) and Pt(100) electrodes studied by IR reflection absorption spectroscopy (Inukai, Ito) 307
Passivation
Electrochemical behaviour of the passive tin electrode in H_2SO_4 solutions at very positive potentials (Bojinov et al.) 177
Passive films
Semiconducting properties of passive films on AISI 304 and 316 stainless steels (Babić, Metikoš-Huković) 143
Passive tin electrode
Electrochemical behaviour of the passive tin electrode in H_2SO_4 solutions at very positive potentials (Bojinov et al.) 177
Pd-powder catalyst
Bulk alloy formation during Ge adsorption onto a Pd-powder catalyst (Bodnar et al.) 327
Photoactivity
Electrochemical behaviour of the passive tin electrode in H_2SO_4 solutions at very positive potentials (Bojinov et al.) 177
Photoemission
Photoemission from metals and the slowing of low energy electrons in water (Benderskii, Grebenshchikov) 111
Platinum
Electrodeposition processes of palladium and rhodium monolayers on Pt(111) and Pt(100) electrodes studied by IR reflection absorption spectroscopy (Inukai, Ito) 307
Platinum polycrystalline
Adsorption of bisulfate anion on a Pt(111) electrode: a comparison of in-situ and ex-situ IRAS (Ogasawara et al.) 337
Polypyrrole
A theoretical model for an amperometric glucose sensor using polypyrrole as the immobilization matrix (Marchesiello, Geniès) 35
Potential step experiment
Electrochemical measurements under microgravity conditions; diffusion limited reaction observed by potential step experiment (Nakabayashi et al.) 333
Prussian Blue
Optical properties of Prussian-Blue-modified gold and platinum single-crystal electrodes (Upadhyay, Kolb) 317
Pyridine
Pyridine adsorption on reconstructed and unreconstructed Au(100) (Skoluda et al.) 343

Random walk processes
The double-layer impedance at a rough surface: numerical results (Leibig, Halsey) 77
Rhodium
Electrodeposition processes of palladium and rhodium monolayers on Pt(111) and Pt(100) electrodes studied by IR reflection absorption spectroscopy (Inukai, Ito) 307
Rough surface
The double-layer impedance at a rough surface: numerical results (Leibig, Halsey) 77

Semiconducting properties
Semiconducting properties of passive films on AISI 304 and 316 stainless steels (Babić, Metikoš-Huković) 143
Single-crystal electrodes
Optical properties of Prussian-Blue-modified gold and platinum single-crystal electrodes (Upadhyay, Kolb) 317
Solvent dynamics
Hammett reaction constants for the electroreduction of substituted chloro- and bromobenzenes: effect of solvent dynamics on the two-electron irreversible reductive cleavage (Jaworski et al.) 203
Square-wave voltammetry
Adsorptive stripping square-wave voltammetry of Bi(III) in chloride media. Influence of triton X-100 (Komorsky-Lovrić, Branica) 273
Surface films
Spectroscopic studies of lithium in an ultrahigh vacuum system (Aurbach et al.) 63

p-Toluenesulfonate-doped polypyrrole
Effect of cations on the electrochemical behavior of *p*-toluenesulfonate-doped polypyrrole in various aqueous solutions (Iseki et al.) 221
Triton X-100
Cyclic voltammetric study of mixed monolayers of methylene blue and Triton X-100 formed spontaneously on mercury (Rodríguez-Amaro et al.) 127
Adsorptive stripping square-wave voltammetry of Bi(III) in chloride media. Influence of triton X-100 (Komorsky-Lovrić, Branica) 273

UDCA theory
Generalization of the UDCA theory and its application to the analysis of the ion-free layer thickness (Andreu et al.) 49
Ultrahigh vacuum
Spectroscopic studies of lithium in an ultra-high vacuum system (Aurbach et al.) 63

Viologen
Covalent binding of viologen to electrode surfaces coated with poly(acrylic acid) formed by electropolymerization of acrylate ions. I. Electrode preparation and characterization (Katz et al.) 247
Covalent binding of viologen to electrode surfaces coated with poly(acrylic acid) prepared by electropolymerization of acrylate ions. II. Effect of the ionization state of the polymeric coating on the formal potential of viologen (Katz et al.) 261

Water
Photoemission from metals and the slowing of low energy electrons in water (Benderskii, Grebenshchikov) 111
Water-soluble metalloporphyrins
Electrocatalysis of metalloporphyrins. Part 13. Electrocatalysis of several water-soluble porphyrins for the oxidation of some small molecules (Pang, Wang) 235

X-ray photoelectron spectroscopy
Spectroscopic studies of lithium in an ultra-high vacuum system (Aurbach et al.) 63
